Hackathon

Hackathon?

Hackathon?

What makes him sad?

Cannot find some friends in KMUTT to do activity together

**WIS
MOD**

Wis MOD

WisMod is a mobile application that aims to connect people among various faculties to unite together in order to do something EPIC!!!

**App for promoting
collaboration
among students.**

Our Goal & Objectives

Goal

Provide a platform for university students to find a group with same interests to complete some particular tasks which require multi-disciplinary skills.

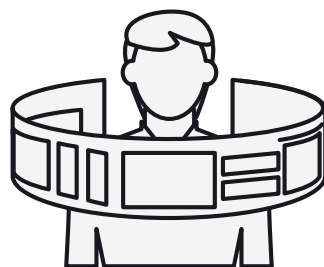

Objectives

Increase student engagement and create a student community where students and staff of KMUTT can find a partner on some tasks.

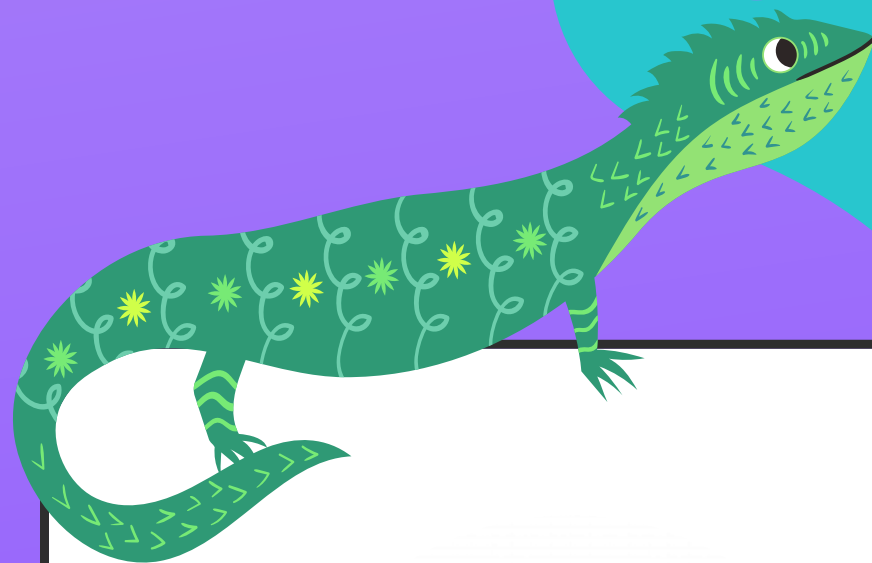

Accessible to all faculties and allows for inter-faculty communication

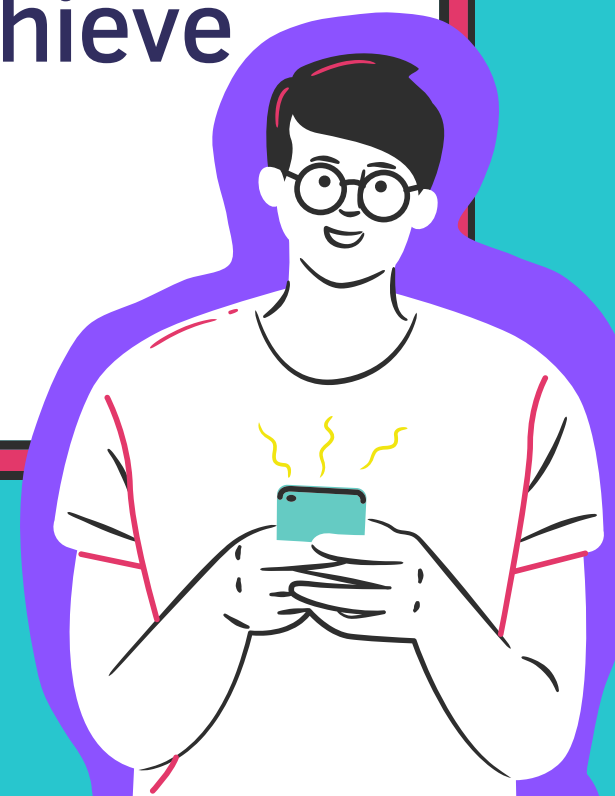

To create the platform for exchanging idea and discussing in creative way (e.g., discuss PM2.5 solution among chemistry student and CS student, etc.)

Target User

KMUTT Students

- Students in KMUTT
- Anyone who want to connect
- Student who needs partnership from another faculty/department to achieve a goal.

Our Main Features

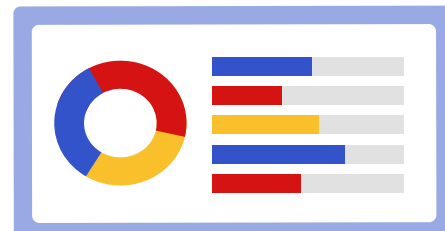

Publishing Event

Users can create and participate in a particular event.

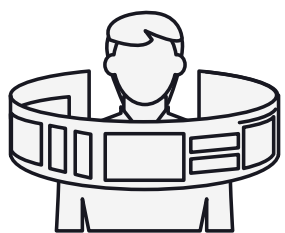

Browsing event

Allows users to explore the event published from many students, and offers the use of search engine.

Dashboard

Summary of what events the users has created or participated.

Admin Supervision

Users can enjoy our platform without having to concern about seeing inappropriate or illegal content because of admin supervision

Publishing Event & Admin Supervision

John creates an
activity, specify
condition and details
and then announce it

Title : Hackathon team needs you!!

Dashboard

Functional Requirements (1).

Notification

WisMod sends notifications to the users, whenever there's some action on that user's event, e.g., chat, upvote.

Publishing Event

Wismod allows you to create an event regarding the predefined categories, if your story has something wrong you can edit it.

Authentication

WisMod authenticates the login/register data of users by using Firebase authentication

Chat

Event organizer and event participant can communicate through the chat function.

Functional Requirements (2)

Browsing & Reaction & Join

You can filter what event you are interested, and upvote or join other people's event that you like

Reporting

Users can report the violent event or illegal activity to admin.

Participant Approval/Rejection

After talking via the chat, after the event owner has decided this participant is allowed to join the party, the owner can approve his request and the number of required member will be updated. Otherwise, the owner can reject the request.

Nonfunctional Requirements

Be able to handle 100 concurrent users at once

Maintainability: Code should be modular and easy to maintain

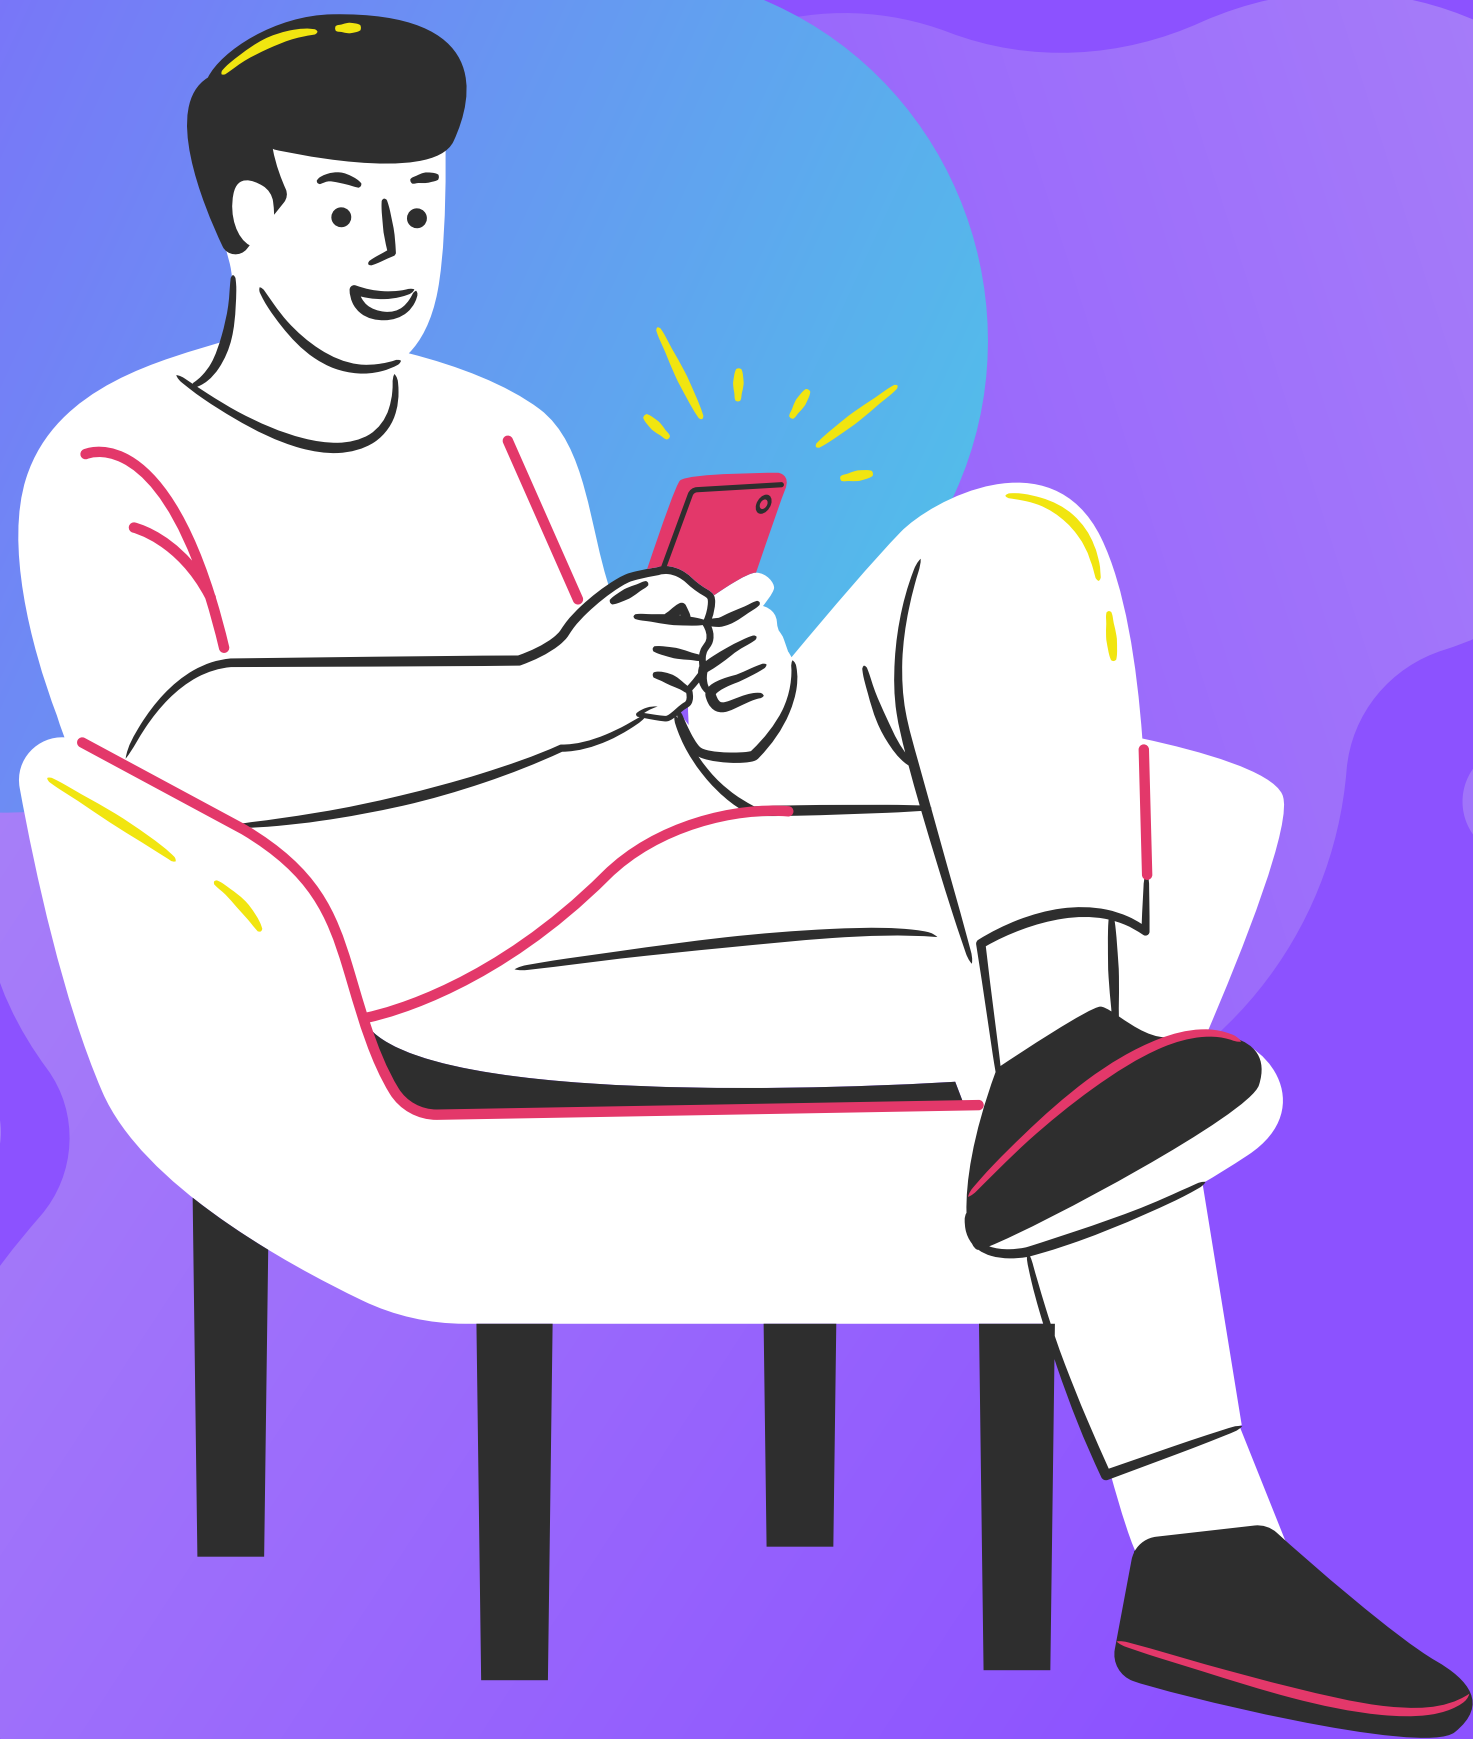

Compatibility: Compatible on different devices

Reliability: Be available 24/7 with minimum downtime

Scalability: Must be able to scale up

Security: Must have proper authentication for good security

Integrity: All events should remain the same, unless there's some edit request from users.

Thank You

Don't forget to download WisMod!
